

Keep ideas Moving

12/11/2015

Good evening, how are you doing and the family at large, we are also fine, only concentrating on the OVC programming, nice to tell you that most of our children are dressed well, have good health and eat at least twice a day.

again we have clothed 64 OVCs with the 61000 kshs you send us in the last budget that is good, the idea of rewarding the best performer among the OVCs is still what I propose. This time not buying the school bags or any thing material but to pay the school fees which will challenge their fellow so that they also put a lot of effort on education, this will help them to become self-reliant in the future and take responsibility of their families. This will in turn help the project to exit some family and as well register other needy people. Unlike the current situation whereby our children are exited due to school dropout and maybe not accessible.

Secondly, for the families, as well as we provide them with Donkey, we also need to develop some alternative source of income generating activities (IGA) and also for those who received donkey it's important if we provide them with some business skill training (such as how to save, how to lend money among themselves e.i. Marry go round) and this by sure will transform their lives in long term. That is my opinion.

Keep ideas Moving. attached are the information updates.
