La carenza d'acqua condiziona già la vita a Sololo

Inusuali i due giorni di pioggia arrivati a dicembre. **L'acqua raccolta fino ad oggi finirà con la fine di febbraio ... Le prossime piogge sono attese per aprile ... A rischio in progressione:** la vita delle piante, delle bestie e dell'uomo; iniziando dalle fasce più deboli che sono i bambini, gli anziani, i malati ...

Ecco la situazione attuale al 30-12-2015 *are the pictures of the two pans showing the level of water as at this morning. This quantity of water suggests can take us up to end of February if not more. As you can see from the pictures you can also conclude water is not sufficient in Sololo, including Ramata Dam.*

... photo of cleared area in Obbitu compound. In this you can also notice there is no enough grasses instead there are scrubs.

Cleared area

Cleared area

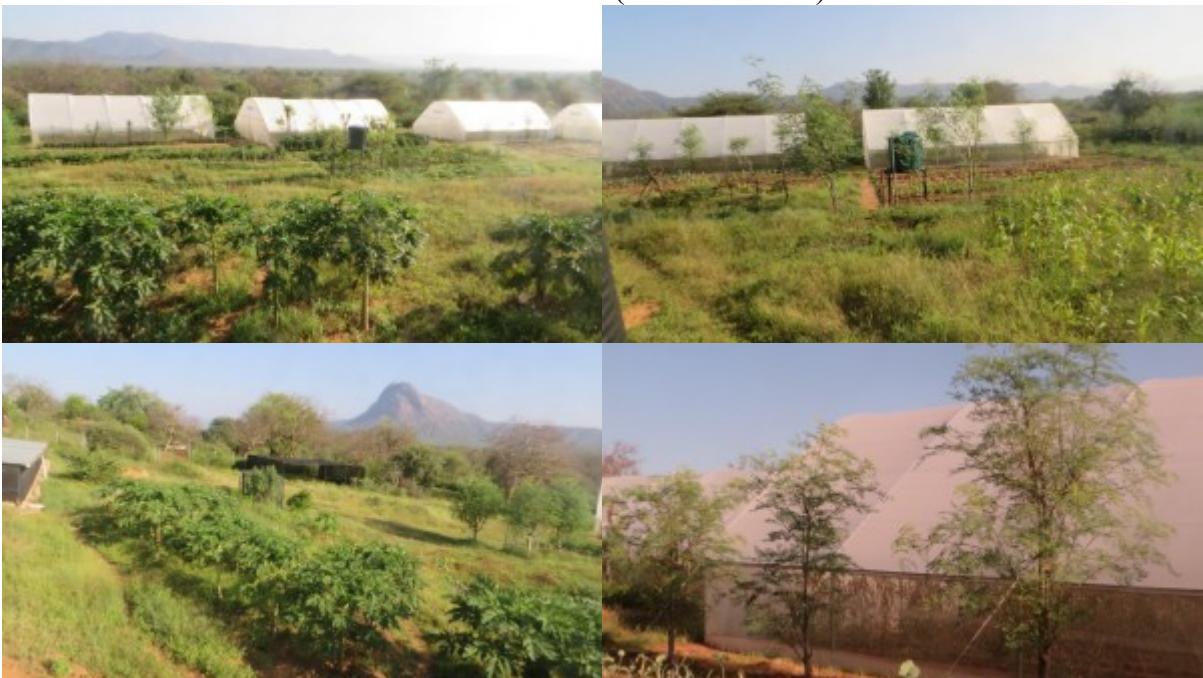

... In the greenhouse pictures, you can see from the pictures which plants are doing well. ... plants like green and red papers, onions, pawpaws, pumpkins are doing well while sukuma wiki, spinach, tomatoes and water melons are not doing well as expected.
