**there is still a very serious crisses in terms of water shortage**

## **C'è un vero serio problema in termini di raccolta acqua**

To give you an overview, **there is still a very serious crisses in terms of water shortage**, there was only one day of Rain around Ramata, Madoadhi, Dambala Fachan, Gadha Korma, Kukub. Only Makutano Village **received Rain for 2 days**.

*Per darvi una visione d'insieme, c'è ancora un problema serio in termini di raccolta d'acqua, c'è stato solo un giorno di pioggia intorno a Ramata, Madoadhi, Dambala Fachan, Gadha Korma, Kukub. Solo il villaggio di Makutano ha ricevuto la pioggia per 2 giorni*

Madoadhi Dam 2-water for this rain season  
Madoadhi Dam-1 this water can take roughly 3 months  
Madoadhi Dam-1 this water can take roughly 3 months

Madoadhi Dam-1 this water can take roughly 3 months  
Mothers coming from the Dam

No water point has increased its Volume except that of sololo Makutano and Mado adhi which is also very dirty and might expose the community to a water born diseases in a near future.

*Nessun punto d'acqua ha aumentato il suo volume eccetto quello di Sololo Makutano e di Mado adhi che è anche molto sporco e potrebbe in un prossimo futuro esporre la comunità a malattie causate dall'acqua.*

Areas like DambalaFachana, GadhaKorma, Kukub still remain as the most affected

*Aree come Dambala Fachana, Gadha Korma, Kukub rimangono ancora le più colpite*

---

The Main water source relied on by the entire community of Sololo is Ramata Dam. It has not received water for this season and might not last for more than 3 months. In fact most part of it still remain dry.

*La principale fonte d'acqua dell'intera comunità di Sololo è il Ramata Dam. Non ha ricevuto sufficiente acqua in questa stagione e quella arrivata potrebbe non durare per più di 3 mesi. In realtà gran parte del Dam rimane ancora asciutta.*

---

Part Of Ramata Dam still empty

The area Receives Light shower almost every morning thus the vegetation look green earning the environment a beautiful canaries like what you saw in pictures.

*L'area riceve una leggera pioggerellina quasi ogni mattina, quindi la vegetazione è verde e l'ambiente guadagna con paesaggi bellissimi come quello che hai visto nelle foto.*
