

THERAPY SUGGESTIONS 2020

29/03/2020

... il trattamento domiciliare in fase precoce potrebbe essere una notevole arma per i colleghi che operano in africa ...

These **THERAPY SUGGESTIONS** come from two Italian hospitals most involved in the war against the virus crown: **Hospital SACCO** - and - **Hospital PAPA GIOVANNI XXIII**

It should all start no later than the first two days of fever, arthralgias, possibly anosmia, ev. diarrhea.

There are two schemes of:

antibiotic therapy + plaquenil + vitamin D + possible antidiarrheal therapy.

DO NOT USE ANTI INFLAMMATORY
DO NOT USE CORTISONE IN THE INITIAL PHASES

NON USARE

GLI ANTI-INFIAMMATORI

NON USARE

IL CORTISONE NELLE FASI INIZIALI
