

02- it's time to show 2020

08/04/2020

it's time to show that you are capable of flying

ok, it's time to show that you are capable of flying ... thank you so much for your donations which are certainly a great help. the Sololo area is also frequented by many people who illegally cross the border arriving from Ethiopia and Somalia where the health situation is unknown. Even the presence of the army, which has components that come from the south and live without being able to respect the distances between them, can be a danger of contagion. Expect to be hit faster and more seriously than you think. Stock up and isolate yourself. Have you thought about the drug stocks I suggested to you?

Ask the government for food supplies. be included among those to be regularly supported. Have all of our families registered as families that the government will have to maintain. Or offer to think about it and get food from the government to distribute. The government will receive international aid to feed ... enter the beneficiaries in any way. Show that you are a structure that can do it better than the red cross that has too many to think about. Making the village staff work less leads to a longer stay at home and therefore a greater chance of bringing the virus into the village. We do not reduce wages to those who will face very difficult moments. **For now we continue as usual, at least until we manage to collect the necessary funding.**

I wrote to you "For now we continue as usual, at least until we manage to collect the necessary funding". In cash in Italy we have money to cover the normal expenses **for the next two months**. If our donors are able to fulfill their promises, we could go until September. We don't do extra shopping other than food and healthcare. Do not reduce meat to minors. We anticipate the purchase of non-perishable food. Margot will soon let you know if she needs more invoices to close the Waldensian church project of the well and the water works for the greenhouses. We have to spend that money only for that and therefore let's do it as soon as possible also by expanding the excavation of pan 3 with casual workers (who do not enter the village) and increasing the help to the staff of the greenhouses so that they can sow and cultivate as much as possible. Let's keep in close contact and decide day by day.

We think we always put health and human lives before us. If it is necessary we will do what you suggest now ... we will be able to help everyone if we will be able to help each other albeit with some sacrifice ... Selflessness wins, not selfishness. Your history and your culture teach it.

Good job.
