### **we have already placed our request to the government**

thank you very much for your input, we shall maintain our junior staffs and their wages.

we have already placed our request to the government through the department of children services. we requested for food, sanitizers, face masks, and hand washing facilities. the government has started to enroll households and we hope the families we support were enrolled and given priority for food distribution. i will advocate for them at the chiefs and village elders level.

there are rumors in Marsabit hospital and sololo hospital of possible case in isolation but testing and result will done in Nairobi.

let stay hopeful it will be just a common cold and corona virus - ve.

thank you
