RE OVC SOLOLO PROJECT

OVC Sololo project has a physical office in sololo Ramata and has been in operation since 2010. The project has two main programmes:
1 Home based care which currently supports 93 families with 345 children including those in secondary schools.
2 Orphan children home currently giving care and support to 19 children

For the last 10 years the project has supported 183 families and 546 children in HBC programme and 34 children at Orphan children's home.

As the area chief who represent the community we have collaborated and I have been involved in its operation and decision making by being a member of sololo project management committee. Other committee members are religious leaders, youth representatives, women group leaders, representatives from ministry of education and health, NGOs working with children and local administrators

We are happy and appreciate the services given by sololo project to sololo community.

The project has helped very many poor and most needy families and children in education, health, food, shelter, clothing and psychosocial support. It has improved living standard of HBC families

Obbitu children's home which operates according to regulations of charitable children services has prevented cases of street children and gives care and support to orphans and vulnerable children.

We are contented and appreciate the quality of services provided by sololo project at Obbitu children's home and home based care programme

On behalf of sololo community under my jurisdiction, I recommend any organization who wishes to partner with sololo project to provide support to OVC sololo project for the benefit of children's welfare

Regards
