

MY HOLIDAY PERMISSION

DARMI DIDA

However, I am happy that I have been given a holiday permission to know all my families. But now I am glad that I have returned back to where I am.

I am very happy that I have seen the house you have built for us. During the holiday I have done many things for my mother and my grandmother who was very sick. I have learnt many things like cooking food, washing clothes, fetching water and even fetching firewood.

The bad thing which I noticed in that small village is that people were ~~using~~ ^{using} many things which would affect their health like tobacco, khat, alcohol, cigarette and many others. Also girls and boys are doing bad things which would not help them.

Inside that house there is no comfortable place to do any thing. The water which was in that village was very dirty. People were walking long distance to look for water in sources in some areas.

In that house there is no money to buy a lot of food and now I ~~have~~ ^{want} to work hard and help my family to be more richers.

In fact it was a fine holiday for me.
