**REQUEST PROPOSAL FOR SUPPORT TO BUY A SALOON CAR FOR GUFU GUYO –  
PROJECT COORDINATOR**

Motor bikes have been my mode of transport. It helped me to attend to services within Sololo on real time. It has carried children to hospitals and sometimes to schools too. I was able to attend stakeholder meetings on real time and back to attend to other office work. It also assisted me to attend to important personal matters and back within short time.

3 years ago I was involved in a motorbike accident in Sololo where I got fracture of the ribs and prescapular bone since then it has been difficult to ride I feel it heavier on my right hand, I feel shy and fearful. I'm suffering from pressure of the eye; the wind is strong on my face ribs and eyes and sometimes feels pain on the ribs where I got fractures. When I ride and use helmet the glass reduces my visibility.

The car will help me to serve the organization, the children in Obbitu and also my personal matters.

I would like to propose to purchase the car through partnership where I contribute part of the cost and the project supports me to pay the balance cost. The car will be privately owned but also serve Obbitu children when there is need.

The type of the car will be a used car which is serviceable and in good mechanical condition with engine capacity of 1800cc. The car I have in mind may be a seven seater to carry few children when need arises and with a wide booth to carry supplies for Obbitu children home.

I estimate the cost to be maximum of 700, 000 Kenya shillings. I can be able to raise 300,000 Kenya shillings and request for support with the extra 400,000/= from the project as one time cost. The model of the car can be Toyota WISH, Mitsubishi, or RAV4. I do not have any car in mind for now

Management and maintenance – I will take personal maintenance for the car and also fuel it. OVC Sololo project will not incur any other expenditure on the car.

I hoping for a positive response

Thanking you
