### Green house activities

The four green houses and its open fields are under cultivation. The open areas near the pans and watchmen towers had been cleared of weeds and fruit trees planted. Moringa trees near greenhouse 4 has grown and its leaves harvested and eaten at Obbitu children home. Moringa trees near father's house 39 trees have grown to the pruning level. 3 trees got broken due to strong wind and heavy rains but it has also sprouted at the root again

### Children food and nutrition in Obbitu children

Milk for one family

1kg of meat for 1 family

Beans stew with vegetables for lunch in Obbitu

## HEALTH CARE

Health assessment was not active while Paul was away. Now that he is back I hope he will accelerate the activity. We have not yet discussed the agreement with PFL for 2015 as it was awaiting Paul hence will be done in this month.

Drugs for the chronic case was not bought, this activity also is under Paul and he was away.

Hassan Gufu, the child with Madura foot was referred to Sololo hospital for way forward with Dr. Ciprian. The Dr. reviewed the foot and consulted Dr. Silvio who will come to Sololo in November. The reply from Dr. Silvio was that the case is slow in advances and therefore it can wait until he comes. 2 X-rays were taken and sent to him for observation and advice. We have agreed with the caregivers to wait until Dr. Silvio will come.

Inspection of Obbitu children for renewal of registration certificate. The inspection was done by Mathew from Education and Mr. Racha of Public Health office Sololo. We are waiting for the reports and recommendation from district children officer and AAC Moyale for approval before presenting to the Nairobi for new certificate.

**CONCLUSION** - Activities are being carried out according to the log frame work and budget allocation per month. All activities are going on well and timely. More consultation is done now with Margot. Thank you - Gufu – program coordinator
